PROFESSIONAL SUMMARY

Cybersecurity professional and MCA graduate with ISC2 Certified in Cybersecurity (CC) and hands-on experience in SIEM monitoring, Windows Event Log analysis, and threat detection. Experienced in building virtual SOC labs using Splunk and investigating Windows authentication events (4624 and 4625) to identify suspicious activity and potential brute-force attacks. Familiar with network security, incident response, and security monitoring. Seeking an entry-level SOC Analyst role to apply skills in security monitoring, alert triage, threat detection, log analysis, and incident response.

TECHNICAL SKILLS

Security Tools: Splunk (SIEM), Wireshark, Nmap, IBM QRadar, Burp Suite, Microsoft Sentinel, Wazuh

Security Concepts: Threat Detection, SIEM Monitoring, Log Analysis, Incident Response, Security Event Analysis

Networking: TCP/IP, DNS, HTTP/HTTPS, DHCP, OSI Model, Common Ports & Protocols, Network Traffic Analysis

Security Frameworks & Standards: MITRE ATT&CK, OWASP Top 10, Cyber Kill Chain

Operating Systems: Windows, Linux, UNIX

Virtualization: VirtualBox

Programming & Query Languages: Python, Bash, PowerShell, SQL, KQL

CERTIFICATIONS

ISC2 Certified in Cybersecurity (CC)

Splunk Fundamentals 1 — Splunk Education

Introduction to Cybersecurity — Cisco Networking Academy

IBM Cybersecurity Fundamentals — IBM

SOC Analyst Course — Brolly Academy

INTERNSHIP EXPERIENCE

Cybersecurity Virtual Intern — EduSkills

Jul 2025 – Sep 2025 | 10 Weeks

- Gained structured exposure to cybersecurity fundamentals, security operations, and industry-oriented security practices.
- Supporting Organization: Palo Alto Networks.

PROJECTS

SOC Detection & Monitoring Lab — Splunk SIEM

- Built a virtual SOC lab using VirtualBox and Splunk Enterprise for centralized Windows security log monitoring.
- Configured Windows Event Log ingestion and developed SPL searches to detect failed authentication attempts and suspicious login activity.
- Investigated Windows Security Event IDs **4624** and **4625** to identify successful and failed authentication patterns.
- Detected multiple failed login attempts and investigated potential **brute-force activity** using Splunk.
- Configured a scheduled Splunk alert to identify Windows failed-login activity.

Network Traffic Analysis — Wireshark

- Analyzed network packets using Wireshark to examine TCP, DNS, and HTTP traffic and identify suspicious network activity.
- Applied protocol filters to investigate source/destination IPs, ports, and network communication patterns.

CYBERSECURITY TRAINING

TryHackMe – SOC Level 1 Path

- Hands-on practice in SOC fundamentals, SIEM, Windows security monitoring, network analysis, incident response, and threat detection.

EDUCATION

Master of Computer Applications (MCA)

SRK Institute of Technology, Vijayawada | JNTUK | CGPA: 7.5 | 2026
